- Derwent Title: **Two-section ladder - has L-shaped stirrups on one section enclosing second one and engaging via openings inside tubular uprights**
- Original Title: ☒ **NL1002235C: LADDER ALSMEDE BEUGEL GESCHIKT VOOR EEN DERGELIJKE LADDER.**
- Assignee: **DIRKS LADDERS EN TRAPPEN VOF Non-standard company**
- Inventor: **DIRKS H M A S;**
- Accession/Update: **1997-478036 / 199744**
- IPC Code: **E06C 1/30 ;**
- Derwent Classes: **Q48;**

- Derwent Abstract: (NL1002235C) The ladder sections are movable in relation to each other, each comprising parallel uprights joined by rungs. The wider (2) of the sections has stirrups (7) at one end enclosing the uprights of the narrower section (3), which slides in them in its lengthwise direction. The long leg of each L-shaped stirrup has a distance-piece joined to its short leg. Offset and parallel to the distance-piece is a connecting portion fitting inside the tubular upright and passing through an opening in its side towards the rungs. At the side towards the shorter leg the connecting portion can have a lip clear of the distance-piece, the plate of the upright fitting between the lip and the distance-piece.
- Advantage** - The ladder sections are easily detachable from each other, and the same stirrups are usable with different sections.
